Fire Department Management Software

# FD Manager Fire Department Management Software

## Management and Reporting Made Easy

A flexible and affordable solution for municipalities, this modular management system provides pre-fire plan information and tracks vehicle and equipment maintenance records, street inventories, hydrant inventory and maintenance, training records, personnel information, and payroll.

FD MANAGER is the first step in our modular management system. This flexible and affordable solution is capable to do as much or as little as you like – add modules as your department needs grow.

**INTUITIVE INTERFACE** - Based on decades of manual procedure

**RAPID DATA ENTRY FORMAT** - simple, fast, intuitive functionality

**COMPREHENSIVE MANAGEMENT SYSTEM** - Covers all department needs in a completely customizable package

**ADVANCED MODULAR ARCHITECTURE** - Completely customizable to meet your specific department's needs. Don't pay for software you will never use – purchase just the modules you need, when you need them.

**INTEGRATED NFIRS 5.0 REPORTING** - NFIRS reports are easily created using current data – saving time and creating accurate, consistent reports.

**FIREFIGHTER ACCOUNTABILITY TRACKING** - Easily generate ride sheet and accountability lists helping to keep your people safe and on the job.
